-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 December 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Response to Arguments

1. Applicant's arguments, with respect to the rejection(s) of claim(s) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn after consultation with SPE regarding the case law cited and a new rejection issued.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent No. 6,493,572 to Su et al.'572.

Su et al.'572 disclose an inherently de-coupled sandwiched solenoidal array coil. The array contains a first coil having a null B sub 1 point and a quasi one peak sensitivity profile, and a second coil oriented with respect to the first coil in a manner that reduces coupling. Several orientations of coils are presented, including overlapping and cascading configurations. The first coil has two sections in which the sections have a different number of turns and the second section has a counter rotational orientation with respect to the first section (column 3, lines 47-65; column 6, lines 38-67; column 7, lines 1-57; column 8, lines 1-15 and 55-67; column 9, lines 4-43; figures 1-8).

Su et al.'572 does not explicitly teach a single peak. However, it would have been obvious to one skilled in the art at the time that the invention was made that the difference

Art Unit: 3737

between a single peak and the two peaks or multiple peaks of the prior art is a difference of degree rather than kind. Any differences between the claimed invention and the prior art may be expected to result in some differences in properties. The issue is whether the properties differ to such an extent that the difference is really unexpected. In re Merck & Co., 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986) (differences in sedative and anticholinergic effects between prior art and claimed antidepressants were not unexpected).

Furthermore, the alternative coil configurations are well known functional equivalents.
